

Rodolfo Henrique Raymundo Engelmann

COMPUTER ENGINEERING STUDENT

CAREER OBJECTIVE

As a final-year Computer Engineering student, I am seeking a remote Junior Developer position, particularly in areas where I have the strongest experience, such as Backend development using Python frameworks like Django and Flask, as well as Frontend development with React. At the same time, I do not limit myself to specific technologies and remain open to learning new tools and methodologies whenever necessary, building upon the technical foundation I have developed to adapt quickly and efficiently. My goal is to contribute positively to the team while continuing to grow professionally alongside the company.

TECHNICAL SKILLS

Programming Languages and Development:

- C, C++, C#, Java, Python, JavaScript, SQL, Web Full-Stack (Django, Django REST Framework, Flask, React), PostgreSQL, MySQL, Git (GitHub and GitLab).

Infrastructure & DevOps:

- Linux, Docker/Docker Compose.

Networking & Streaming:

- Computer Networks, RTSP, WebRTC.

Data & Computer Vision:

- Python Data Analysis, OpenCV.

Embedded Systems:

- Raspberry Pi, Arduino, ESP32.

Languages:

- English (Upper-Intermediate)
- Portuguese (Native)

Portfolio:

- [Projects and technical details](#)

EDUCATION

Instituto Federal de São Paulo - Campus Piracicaba

Bachelor of Computer Engineering
Jan 2020 – Expected Graduation: Nov 2026

- Member of the Competitive Programming Team.
- Research project focused on Web Development.
- Research project focused on Image Processing and Neural Networks.

Colégio Acadêmico

High School Diploma with Academic Distinction
2009 – 2019

- Graduated with Honors.
- Medalist – Brazilian Robotics Olympiad (OBR).
- Medalist – Brazilian Olympiad in Informatics (OBI).
- Medalist – First Lego League (FLL).

PROFESSIONAL EXPERIENCE

Quickium Tecnologia Ltda

Software Development Intern | Dec 2024 – May 2026

- Developed backend solutions using Django and Flask.
- Worked on embedded systems, networking, and infrastructure projects.
- Contributed to frontend development and full-stack feature implementation.
- Collaborated on software design and implementation across multidisciplinary teams.

FAI UFSCar

Software Development Scholarship Student | Sep 2025 – Present | 20h/week

- Selected for a university-sponsored software development project.
- Developed backend services for the [DashBacias](#) platform, a web platform with interactive mapping for managing and visualizing environmental management data.
- Worked on data integration, processing, and analysis.
- Collaborated with multidisciplinary teams.

ACADEMIC EXPERIENCE

International Journey of Science and Technology

KSCIA – NASA | October 2017

- Selected through a competitive process based on academic performance and knowledge in mathematics, science, and English.
- Participated in an intensive educational program organized by the International Space Academy (KSCIA).
- Attended advanced science and technology activities hosted at NASA facilities.
- Developed knowledge in scientific research, technological innovation, and aerospace-related disciplines.
